signup	Application is running; user is on landing page.	Verify that a user is successfully created with all the correct data.	1.Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Enter all data 4.Click "Sign Up"	Username :khader Password : 123456789 Phone : 0569974804	The user must be created successfully, and the login process must succeed when using these credentials.	The user has been successfully created, and a success message appears: "Account created successfully. Please log in."	pass	
	Application is running; user is on landing page. User khader with phone 0569974804 already exists	Verify that the user creation process fails if a user with the same username or phone number already exists.	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Enter all data 4.Click "Sign Up"	Username :khader Password : 123456789 Phone : 0569974804	The user creation process must not succeed, and an error message must appear stating that the phone number or username already exists.	The account was not created, and an error message appears informing the user that "the username or phone number already exists."	pass	
	Application is running; user is on landing page.	Verify that when the username field is left empty, the account is not created.	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Leave the Username field completely blank. 4.Enter a valid password and phone number. 5.Click "Sign Up"	Username : Password : 123456789 Phone : 0569974804	User creation should not be successful, and you should receive an error message saying "Please fill out this field."	The account was not created, and an error message appears informing the user: "Please fill out this field."	pass	
	Application is running; user is on landing page.	Verify that when the password field is left empty, the account is not created.	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Leave the Password field completely blank. 4.Enter a valid username and phone number. 5.Click "Sign Up"	Username : khader Password : Phone : 0569974804	User creation should not be successful, and you should receive an error message saying "Please fill out this field."	The account was not created, and an error message appears informing the user: "Please fill out this field."	pass	
	Application is running; user is on landing page.	Verify that when the phone field is left empty, the account is not created.	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Leave the Phone field completely blank. 4.Enter a valid password and username. 5.Click "Sign Up"	Username :khader Password : 123456789 Phone :	User creation should not be successful, and you should receive an error message saying "Please fill out this field."	The account was not created, and an error message appears informing the user: "Please fill out this field."	pass	
	Application is running; user is on landing page.	Verify that the user creation process fails if characters or special symbols are typed in the phone number field	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Enter invalid Phone data. 4.Enter a valid password and username. 5.Click "Sign Up"	Username :khader Password : 123456789 Phone : abc!@#%	User creation should not be successful, and a validation message or error styling should appear indicating that the phone format must contain only digits.	The user has been successfully created, and a success message appears: "Account created successfully. Please log in."	fail	This is a Bug
	Application is running; user is on landing page.	Verify that when fields are filled only with blank spaces (whitespaces), the account is not created.	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Enter only spaces using the spacebar into all fields. 4.Click "Sign Up"	Username : Password : Phone :	User creation should not be successful, and a validation message or error styling should appear indicating that Please fill out this field.	The user has been successfully created, and a success message appears: "Account created successfully. Please log in."	fail	This is a Bug
login	Application is running; user is on landing page. Add user	Verify that the password field in the sign-up form properly masks characters to maintain user privacy.	1. Navigate to the website (http://localhost:3000/) 2.Go to signup form 3.Enter the password	Username :khader Password : 123456789 Phone : 0569974804	The characters typed inside the password box should not appear as plain text; rather, they should appear immediately disguised as dots or stars (*****)	Characters are completely hidden and appear as dots as soon as they are typed; no plain text is displayed.	pass	
	Application is running; user is on the landing page. Add user	Verify successful login when using a valid username and password.	1. Navigate to the website (http://localhost:3000/) 2.Go to login form 3.Enter the username 4.Enter the password 5.Click the login button	Username :khader Password : 123456789	The user must successfully log in and be redirected to the appointments page.	The user logged in successfully, and the system redirected them to the appointments page.	pass	
	Application is running; user is on the landing page. Add user	Verify that login fails when entering an incorrect password for an existing user.	1. Navigate to the website (http://localhost:3000/) 2.Go to login form 3.Enter a valid username 4.Enter an incorrect password 5.Click the login button	Username :khader Password : 123456734	The login process must not succeed, and an error message should appear to notify the user.	The login process failed, and an error message appeared to the user stating: "Invalid username or password"	pass	
	Application is running; user is on the landing page. Add user	Verify that login fails when using a username that does not exist in the system.	1. Navigate to the website (http://localhost:3000/) 2.Go to login form 3.Enter a valid password 4.Enter an incorrect username 5.Click the login button	Username :khader122 Password : 123456734	The login process must not succeed, and an error message should appear to notify the user.	The login process failed, and an error message appeared to the user stating: "Invalid username or password"	pass	
	Application is running; user is on the landing page. Add user	Verify that the user does not log in when leaving the username field blank.	1. Navigate to the website (http://localhost:3000/) 2.Go to login form 3.Keep username field empty 4.Enter a valid password 5.Click the login button	Username : Password : 123456734	The login process must not succeed, and an error message should appear to notify the user.	The user is not logged in, and an error message appears stating: "Please fill in this field."	pass	
	Application is running; user is on the landing page. Add user	Verify that the user does not log in when leaving the password field blank.	1. Navigate to the website (http://localhost:3000/) 2.Go to login form 3.Enter a valid username 4.Keep password field empty 5.Click the login button	Username :khader Password :	The login process must not succeed, and an error message should appear to notify the user.	The user is not logged in, and an error message appears stating: "Please fill in this field."	pass	
	The application is running; User is signed up; The user is logged in.	Verify successful appointment booking when valid future date and time are provided.	1. Navigate to the website (http://localhost:3000/) 2.Sign up 3.login 4.Go to the booking form. 5.Select a valid future Date. 6.Enter a Start Time. 7.Enter an End Time ensuring the duration is at least 30 minutes. 8.Click the "Book Appointment" button.	Date: 15-08-2027 Start Time: 10:00 End Time: 11:00	The appointment booking process must be completed successfully, With a success message appearing.	The appointment was successfully booked, and a message appeared stating the following-"Appointment booked successfully"	pass	
booking	The application is running; User is signed up; The user is logged in.	Verify that booking fails when attempting to book an appointment with a past date.	1. Navigate to the website (http://localhost:3000/) 2.Sign up 3.login 4.Go to the booking form. 5.Select a past Date. 6.Enter a Start Time. 7.Enter an End Time ensuring the duration is at least 30 minutes. 8.Click the "Book Appointment" button.	Date: 15-08-2025 Start Time: 10:00 End Time: 11:00	The booking process must not succeed; an error message must appear informing the user that a past date cannot be selected.	The appointment was not booked, and an error message appeared stating: "Cannot book an appointment in the past"	pass	
	The application is running; User is signed up; The user is logged in.	Verify that booking fails when the appointment duration is less than 30 minutes.	1. Navigate to the website (http://localhost:3000/) 2.Sign up 3.login 4.Go to the booking form. 5.Select a valid future Date. 6.Enter a Start Time. 7.Enter an End Time less than 30 minutes 8.Click the "Book Appointment" button.
