Tracking Shipment form	The server is running	Make sure all fields and buttons are visible.	1.Open the website http://localhost:3000/ 2.Observe the form		The tracking ID field, password field, and tracking button should appear.	The tracking ID field, password field, and tracking button are displayed.	pass	
	The server is running	Verify successful tracking with valid Tracking ID and Password	1.Opne the website http://localhost:3000/ 2.Enter the Tracking ID 3.Enter the Password	Tracking ID = 0 Password = 0	The shipment information and all shipment stages should be loaded successfully and displayed to the user	All shipment information is successfully displayed and all stages loaded successefully and displayed to the user	pass	
	The server is running	Confirm that the tracking process failed when an invalid ID number was entered.	1.Opne the website http://localhost:3000/ 2.Enter invalid Tracking ID 3.Enter the Password	Tracking ID = 123 Password = 0	The shipment information and all shipment stages should not be loaded successfully or displayed to the user and an error message should appear "Invalid Tracking ID or Password"	The shipment information and all its stages were not successfully loaded or displayed to the user, and an error message appeared: "Invalid Tracking ID or Password"	pass	
	The server is running	Confirm that the tracking process failed when an invalid password number was entered.	1.Opne the website http://localhost:3000/ 2.Enter the Tracking ID 3.Enter invalid Password	Tracking ID = 0 Password = 231	The shipment information and all shipment stages should not be loaded successfully or displayed to the user and an error message should appear "Invalid Tracking ID or Password"	The shipment information and all its stages were not successfully loaded or displayed to the user, and an error message appeared: "Invalid Tracking ID or Password"	pass	
	The server is running	Confirm that the tracking process failed when an empty ID number was entered.	1.Opne the website http://localhost:3000/ 2.Keep Tracking ID empty 3.Enter the Password	Tracking ID = Password = 0	The shipment information and all shipment stages should not be loaded successfully or displayed to the user and an error message should appear "Invalid Tracking ID or Password"	The shipment information and all its stages were not successfully loaded or displayed to the user, and an error message appeared: "Invalid Tracking ID or Password"	pass	
	The server is running	Confirm that the tracking process failed when an empty password number was entered.	1.Opne the website http://localhost:3000/ 2.Enter the Tracking ID 3.Keep Password empty	Tracking ID = 0 Password =	The shipment information and all shipment stages should not be loaded successfully or displayed to the user and an error message should appear "Invalid Tracking ID or Password"	The shipment information and all its stages were not successfully loaded or displayed to the user, and an error message appeared: "Invalid Tracking ID or Password"	pass	
Tracking Shipment stage	The server is running The user logged in	Verify that the stages are displayed correctly	1.Opne the website http://localhost:3000/ 2.Observe the stages	Tracking ID = 0 Password = 0	All 6 stages must appear with all buttons.	All 6 stages appeared with all buttons successfully.	pass	
	The server is running The user logged in	Verify Stage 1 buttons are enabled initially and pending button is disabled	1.Opne the website http://localhost:3000/ 2.Observe the stage1 buttons	Tracking ID = 0 Password = 0	Done button should be enabled, Pending button should be disabled, and Rejected button should be enabled	Done button is enabled, Pending button is disabled, and Rejected button is enabled	pass	
	The server is running The user logged in	Verify Stage 2 buttons are disabled initially	1.Opne the website http://localhost:3000/ 2.Observe the stage2 buttons	Tracking ID = 0 Password = 0	Done button should be disabled, Pending button should be disabled, and Rejected button should be disabled	Done button is disabled, Pending button is disabled, and Rejected button is disabled	pass	
	The server is running The user logged in	Verify Stage 3 buttons are disabled initially	1.Opne the website http://localhost:3000/ 2.Observe the stage3 buttons	Tracking ID = 0 Password = 0	Done button should be disabled, Pending button should be disabled, and Rejected button should be disabled	Done button is disabled, Pending button is disabled, and Rejected button is disabled	pass	
	The server is running The user logged in	Verify Stage 4 buttons are disabled initially	1.Opne the website http://localhost:3000/ 2.Observe the stage4 buttons	Tracking ID = 0 Password = 0	Done button should be disabled, Pending button should be disabled, and Rejected button should be disabled	Done button is disabled, Pending button is disabled, and Rejected button is disabled	pass	
	The server is running The user logged in	Verify Stage 5 buttons are disabled initially	1.Opne the website http://localhost:3000/ 2.Observe the stage5 buttons	Tracking ID = 0 Password = 0	Done button should be disabled, Pending button should be disabled, and Rejected button should be disabled	Done button is disabled, Pending button is disabled, and Rejected button is disabled	pass	
	The server is running The user logged in	Verify Stage 6 buttons are disabled initially	1.Opne the website http://localhost:3000/ 2.Observe the stage6 buttons	Tracking ID = 0 Password = 0	Done button should be disabled, Pending button should be disabled, and Rejected button should be disabled	Done button is disabled, Pending button is disabled, and Rejected button is disabled	pass	
	The server is running The user logged in	Verify rejection controls are hidden initially	1.Opne the website http://localhost:3000/ 2.Observe the stages	Tracking ID = 0 Password = 0	Rejection reason textbox and Submit button should hidden for all stages.	Rejection reason textbox and Submit button are hidden for all stages.	pass	
	The server is running The user logged in	Verify rejection controls appear when Rejected button is clicked	1.Opne the website http://localhost:3000/ 2.Click the Rejected button in stage1	Tracking ID = 0 Password = 0	Rejection reason textbox and Submit button should become visible.	Rejection reason textbox and Submit button become visible.	pass	
	The server is running The user logged in	Verify stage cannot be rejected without entering a reason	1.Opne the website http://localhost:3000/ 2.Click the Rejected button in stage1 3.Keep the textbox empty 4.Click submit	Tracking ID = 0 Password = 0	The rejected request should not be accepted, and an error message should appear.	The rejected request was not accepted, and an error message appeared: "Please provide a reason for rejection."	pass	
	The server is running The user logged in	Verify stage can be rejected after entering a valid reason	1.Opne the website http://localhost:3000/ 2.Click the Rejected button in stage1 3.Enter the rejected reason 4.Click submit	Tracking ID = 0 Password = 0 Rejected reason = "test"	The rejected application must be accepted, and a success message must appear.a success message must appear.	The rejected application has been accepted, and a success message should appear: "Stage 1 marked as rejected".	pass	
	The server is running The user logged in	Verify a rejected stage can be changed to Pending	1.Opne the website http://localhost:3000/ 2.Click the Rejected button in stage1 3.Enter the rejected reason 4.Click submit 5.Click pending	Tracking ID = 0 Password = 0 Rejected reason = "test"	The stage status should change to "Pending," and a success message should appear.success message should appear.	The stage status change to "Pending", and a success message should appear: "Stage 1 marked as pending".	pass	
	The server is running The user logged in	Verify a rejected stage can be changed to Done	1.Opne the website http://localhost:3000/ 2.Click the Rejected button in stage1 3.Enter the rejected reason 4.Click submit 5.Click Done	Tracking ID = 0 Password = 0 Rejected reason = "test"	The stage status should change to "Done," and a success message should appear.success message should appear.	The stage status change to "Done", and a success message should appear: "Stage 1 marked as done".	pass	
	The server is running The user logged in	Verify a pending stage can be changed to Done or Rejected	1.Opne the website http://localhost:3000/ 2.Click the Pending button in stage1	Tracking ID = 0 Password = 0	Stage status should changes to Done or rejected.	Stage status changes to Done or rejected.		
	The server is running The user logged in	Verify users cannot skip shipment stages	1.Opne the website http://localhost:3000/ 2.Go to stage 3	Tracking ID = 0 Password = 0	The stage 3 buttons should be disabled.	The stage 3 buttons are disabled.		
	The server is running The user logged in	Verify Stage 2 becomes available after Stage 1 is completed	1.Opne the website http://localhost:3000/ 2.Click Done on stage 1	Tracking ID = 0 Password = 0	The buttons for the second stage must be activated, and a message will appear indicating that the first stage has been completed successfully.	The buttons for the second stage were activated, and the message "Stage 1 has been marked as complete" appeared.	pass	
	The server is running The user logged in	Verify Stage 3 becomes available after Stage 2 is completed	1.Opne the website http://localhost:3000/ 2.Click Done on stage 2	Tracking ID = 0 Password = 0	The buttons for the third stage must be activated, and a message will appear indicating that the second stage has been completed successfully.	The buttons for the second stage were activated, and the message "Stage 2 has been marked as complete" appeared.	pass	
	The server is running The user logged in	Verify Stage 4 becomes available after Stage 3 is completed	1.Opne the website http://localhost:3000/ 2.Click Done on stage 3	Tracking ID = 0 Password = 0	The buttons for the fourth stage must be activated, and a message will appear indicating that the third stage has been completed successfully.	The buttons for the second stage were activated, and the message "Stage 3 has been marked as complete" appeared.	pass	
	The server is running The user logged in	Verify Stage 5 becomes available after Stage 4 is completed	1.Opne the website http://localhost:3000/ 2.Click Done on stage 4	Tracking ID = 0 Password = 0	The buttons for the fifth stage must be activated, and a message will appear indicating that the fourth stage has been completed successfully.	The buttons for the second stage were activated, and the message "Stage 4 has been marked as complete" appeared.	pass	
	The server is running The user logged in	Verify Stage 6 becomes available after Stage 5 is completed	1.Opne the website http://localhost:3000/ 2.Click Done on stage 5	Tracking ID = 0 Password = 0	The buttons for stage six must be activated, and a message will appear indicating that stage five has been completed.	The buttons for the second stage were activated, and the message "Stage 5 has been marked as complete" appeared.	pass	
	The server is running The user logged in	Verify final shipment stage can be completed	1.Opne the website http://localhost:3000/ 2.Click Done on stage 6	Tracking ID = 0 Password = 0	A message will appear indicating that stage six is complete.	A message appears saying: "Stage 6 has been marked as complete."	pass	

	The server is running The user logged in	Verify a completed stage cannot be modified	1.Opne the website http://localhost:3000/ 2.Click Done on Stage 1 3.Try clicking Pending 4.Try clicking Rejected	Tracking ID = 0 Password = 0	Stage 1 buttons become disabled and cannot be changed.	Stage 1 buttons are disabled and undclickable.	pass	
	The server is running The user logged in	Verify all shipment stages can be completed sequentially	1.Opne the website http://localhost:3000/ 2.Complete Stages 1–6 in order.	Tracking ID = 0 Password = 0	All stages should completed successfully.	All stages are completed successfully.	pass
