Get all civils	The data file exists and contains civil records	Verify that all civil records stored in the file are displayed automatically when the website opens	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table	Civil records file	All civil records from the file should appear automatically on the page without the need to click "Refresh"	The all civil data appear in the table	pass	
Get one civil using id	The data file exists and contains civil records The user the this id exists in the file	Verify that when search the user by id the whole information appears correctly	1. Open a browser 2. Enter the website URL (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Go to the search box 5. Enter a valid civil ID 6. Observe whether the correct civil information appears	valid user id	The civil record with the entered ID should appear with all its information displayed correctly	The civil record with the specified ID appeared in the table with all its information displayed correctly	pass	
Get one civil using name	The data file exists and contains civil records The civil for this name exists in the file	Verify that when search the user by name the whole information appears correctly	1. Open a browser 2. Enter the website URL (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Go to the search box 5. Enter a valid civil name 6. Observe whether the correct civil information appears	valid user name	The civil record with the entered name should appear with all its information displayed correctly	The civils records with the specified name appeared in the table with all its information displayed correctly	pass	
Refresh button	The data file exists and contains civil records	Verify that clicking the "Refresh" button reloads and displays all civil records from the file	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click refresh button 5. Observe whether the table reloads with all civil records	Civil records file	All civil records from the file should reload and appear correctly in the table after clicking refresh button	The whole civils record appear	pass	
Add civil	The data file exists and contains civil records	Verify that a new civil record can be added successfully when all mandatory fields are filled and a new ID is provided.	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the first name like "Khader" 6. Enter all mandatory civil data with id 7. Click save button 8. Observe the table if the new civil added	valid Civil data	The new Civil should successfully added to the file and appear in the table	The new civil add successfully and appear in the table	pass	
Firstname in add civil form	The add civil form open	Verify that the first name field accepts valid text input	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the first name like "Khader" 6. Enter all mandatory civil data with id 7. Click save button 8. Observe the table if the new civil added	Valid first name data	The new Civil should successfully added to the file and appear in the table with the entered first name	The new civil record was added successfully and appeared in the table with the entered first name	pass	
Firstname in add civil form	The add civil form open	Verify that the first name field does not accept empty value	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Keep first name empty 6. Enter all mandatory civil data with id 7. Click save button 8. Observe the table if the new civil added		The new Civil should not successfully added to the file and should not appear in the table with the entered first name	The civil record was not added. A validation message appeared indicating that first name cannot be empty	pass	
Lastname in add civil form	The add civil form open	Verify that the last name field accepts valid text input	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the last name like "Qaabar" 6. Enter all mandatory civil data with id 7. Click save button 8. Observe the table if the new civil added	Valid last name data	The new Civil should successfully added to the file and appear in the table with the entered last name	The new civil record was added successfully and appeared in the table with the entered last name	pass	
Lastname in add civil form	The add civil form open	Verify that the last name field does not accept empty value	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Keep last name empty 6. Enter all mandatory civil data with id 7. Click save button 8. Observe the table if the new civil added		The new Civil should not successfully added to the file and should not appear in the table with the entered last name	The civil record was not added. A validation message appeared indicating that last name cannot be empty	pass	
ID field in add civil form	The add civil form open	Verify that the ID field accepts only numeric input and is unique	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the ID like "12" and sure it is unique 6. Enter all mandatory civil data 7. Click save button 8. Observe the table if the new civil added	Valid ID	The new Civil should successfully added to the file and appear in the table with the entered ID	The new civil record was added successfully and appeared in the table with the entered numeric ID.	pass	
ID field in add civil form	The add civil form open	Verify that the ID field does not accept the text input	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the ID like "AB" 6. Enter all mandatory civil data 7. Click save button 8. Observe the table if the new civil added	invalid ID	The new civil record should not be successfully added to the file and should not appear in the table with the entered ID	The new civil record was added successfully and appeared in the table with the entered text ID.	fail	This is bug
ID field in add civil form	The add civil form open	Verify that the ID field does not accept empty value	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Keep ID field empty 6. Enter all mandatory civil data 7. Click save button 8. Observe the table if the new civil added		The new civil record should not be successfully added to the file and should appear with a message: "Please enter civil ID"	The civil record was not added. A validation message appeared: "Please enter civil ID"	pass	
Age field in add civil form	The add civil form open	Verify that the age field accepts only numeric input	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the age like "6" 6. Enter all mandatory civil data with id 7. Click save button 8. Observe the table if the new civil added	valid age	The new civil record should be successfully added to the file and should appear in the table with the entered age	The new civil record was added successfully and appeared in the table with the entered age	pass	
Age field in add civil form	The add civil form open	Verify that the age field does not accept the text input	1. open browser 2. enter the website url (http://localhost:3000/#) 3. Confirm that all civil records appear in the table 4. Click the "Add Civil" button 5. Enter the age like "AB" 6. Enter all mandatory civil data 7. Click save button 8. Observe the table if the new civil added	invalid age	The new civil record should not be successfully added to the file and should not appear in the table with the entered age	The civil record was not added. The field does not allow the user to enter text	pass	

			1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the age like "-1" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added					
Age field in add civil form	The add civil form open	Verify that the age field doesn't accept input less than zero		invalid age	The new civil record should not be successfully added to the file. Instead, the system should display a validation message labeled: "Age must be zero or greater"	The civil record was not added. A validation message appeared: "Age must be zero or greater"	pass	
Age field in add civil form	The add civil form open	Verify that the age field accept input with value zero	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the age "0" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	valid age	The new civil record should be successfully added to the file and appear in the table	The new civil record was added successfully and appeared in the table with age = 0	pass	
Age field in add civil form	The add civil form open	Verify that the age field accept input more than zero	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the age "1" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	valid age	The new civil record should be successfully added to the file and appear in the table	The new civil record was added successfully and appeared in the table with the entered age	pass	
Age field in add civil form	The add civil form open	Verify that the age field accept input less than 120	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the age "119" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	valid age	The new civil record should be successfully added to the file and appear in the table	The new civil record was added successfully and appeared in the table with the entered age	pass	
Age field in add civil form	The add civil form open	Verify that the age field accept input with value 120	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the age "120" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	valid age	The new civil record should be successfully added to the file and appear in the table	The new civil record was added successfully and appeared in the table with the entered age.	pass	
Age field in add civil form	The add civil form open	Verify that the age field accept input more than 120	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the age "121" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	invalid age	The new civil record should not be successfully added to the file. Instead, the system should display a validation message labeled: "Value must be less or equal 120"	The civil record was not added. A validation message appeared: "Value must be less or equal to 120."	pass	
Phone number field in add civil form	The add civil form open	Verify that the phone number field accepts only numeric input	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the phone number like "0569974804" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	Valid phone number	The new Civil should successfully added to the file and appear in the table with the entered phone number	The new civil record was added successfully and appeared in the table with the entered phone number.	pass	
Phone number field in add civil form	The add civil form open	Verify that the phone number field doesn't accept the text input	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter the phone number like "ABasasads" 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	invalid phone number	The new civil record should not be successfully added to the file and should not appear in the table with the entered phone number	The new civil record was added successfully and appeared in the table with the entered phone number.	fail	This is bug
Phone number field in add civil form	The add civil form open	Verify that the phone number field doesn't accept empty value	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Keep phone number empty 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added		The new civil record should not be successfully added to the file and should not appear in the table	The civil record was not added. A validation message appeared indicating that phone number cannot be empty.	pass	
Gender field in add civil form	The add civil form open	Verify that the gender field except only femal or male	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Chose Male or Female 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	Gender data	The new civil record should be successfully added to the file and should appear in the table	The new civil record was added successfully and appeared in the table without the selected gender	fail	This is bug
Gender field in add civil form	The add civil form open	Verify that the gender field doesn't accept empty value	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Keep gender empty 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added		The new civil record should not be successfully added to the file and should not appear in the table	The civil record was not added. A validation message appeared indicating that gender cannot be empty	pass	
Date of birthday field in add civil form	The add civil form open	Verify that the Date of Birth field accepts a valid date format	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter Date of Birth = 15/06/1990 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	DOB data	The new civil record should be successfully added to the file and should appear in the table	The new civil record was added successfully and appeared in the table without the entered Date of Birth.	fail	This is bug
Date of birthday field in add civil form	The add civil form open	Verify that the Date of Birth field doesn't accepts a invalid date format	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter Date of Birth = 1990-15-06 or 15-1990-06 6.Enter all mandatory civil data 7. Click save button 8.Observe the table if the new civil added	DOB data	The new civil record should not be successfully added to the file and should not appear in the table and The system should display a validation message like: "Invalid date format. Please use DD/MM/YYYY."	The field does not allow the user to change the format	pass	

Date of birthday field in add civil form	The add civil form open	Verify that the Date of Birth field does not accept future dates	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Enter Date of Birth = 11/12/2027 6.Enter all mandatory civil data 7. Click save button 8. Observe the table if the new civil added	DOB data	The new civil record should not be successfully added to the file and should not appear in the table and The system should display a validation message like: "Date of Birth cannot be in the future."	The civil record was not added. A validation message appeared: "Value must be 31/12/2025 or earlier"	pass	
Date of birthday field in add civil form	The add civil form open	Verify that the Date of Birth field cannot be left empty	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Add Civil" button 5.Keep the DOB field empty 6.Enter all mandatory civil data 7. Click save button 8. Observe the table if the new civil added		The new civil record should not be successfully added to the file and should not appear in the table and The system should display a validation message like: "Please enter Date of Birth"	The new civil record was added successfully and appeared in the table without DOB	fail	This is bug
Edit civil	The data file exists and contains civil records	Verify that an existing civil record can be edited successfully without changing the ID	1.open browser 2.enter the website url (http://localhost:3000/#) 3.Confirm that all civil records appear in the table 4.Click the "Edit" button for specific civil 5.Change one or more fields without id 6.Click save button 8.Observe the table if the edit data appear	Valid civil record with existing ID	The civil record should be updated successfully with the new data, and the ID should remain unchanged	The civil record was updated successfully with the new data, and the ID remained unchanged	pass
